

LogTag Recorders

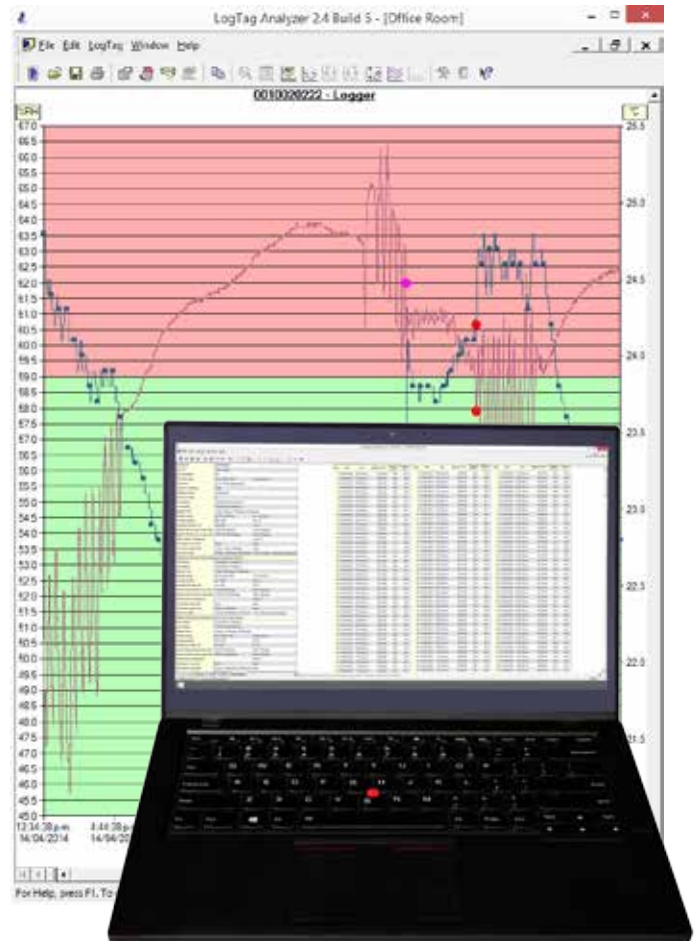

SRIC-4 Single-Use Temperature Recorder

The LogTag® SRIC-4 is a single-trip temperature recorder developed specifically for monitoring temperature sensitive products in both short haul and long-distance transportation applications.

The LogTag® SRIC-4 combines all the features of an advanced temperature recorder with a 3968 log memory and a 6-month operating life in a robust and inexpensive package with an external temperature sensor uniquely arranged in a recess in the case. This arrangement protects the sensor from physical damage while retaining the faster response time normally associated with remote sensors.

Product Highlights

- Single trip recorder for short or long haul transportation applications.
- A real time clock provides date/time stamps for each temperature reading.
- Push-to-start button with optional delay or a specific time & date.
- Fully featured recorder with a 3968 log memory and 6-month operating life in a robust yet inexpensive package.
- In-transit inspections can be recorded at the push of a button.
- Complies with industry standards including EN12830, FDA CFR21 Part 11 & RoHS.
- Industry best download time - less than 5 seconds for fully memory.
- 'OK' & 'ALERT' Indicator with high and low customisable alarms.

SRIC-4 Specifications

FDA CFR21 Part 11 Compliance

RoHS Directive

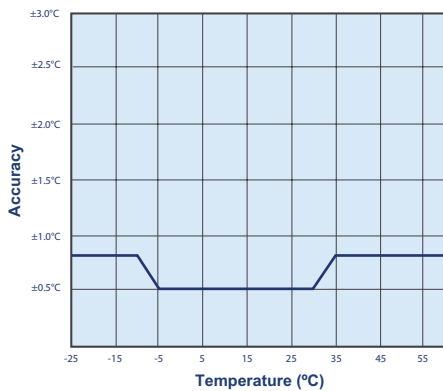

EMC Compliance

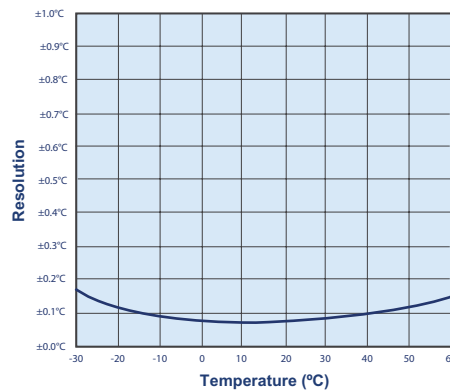

Product Model	SRIC-4
Measurement Range	-25°C ~ +60°C (-40°F ~ +185°F)
Capacity	3968 readings
Sampling Interval	Adjustable, 30 sec to several hours
Environmental	IP65 (roughly equivalent to NEMA 4)
Power Source	3V LiMg battery
Battery Life	Projected life of 6 months of operation from time of configuration. Up to 2 years before configuration.
Size	77mm(H)x54.5mm(W)x8.6mm(T)
Weight	28g
Case Material	Polycarbonate
